

ASTRONOMY CHECKLIST

The first night with your telescope
A little packing list for your star trip

Simply tick it off.

Telescope with the matching accessories

Flashlight, which is covered with red cellophane.
(protects your eyes so you can see better in the dark)

Mobile phone with Star App or a printed star chart

Backpack with warm clothes (possibly a blanket)

A picnic blanket to sit on

Food and drinks

A suitable place without much light pollution,
preferably a place away from artificial lights.

Camping chair

A table to put your things on
